When Summer Shows Up on Your Skin

Meet our new brightening facial.

Somewhere between Memorial Day and now your skin started to do its own thing.

Maybe it's looking a little duller. Maybe your glow packed up and took its own getaway. And suddenly your makeup just isn't makeup-ing the way it used to.

You can blame summer.

Between the sun, heat, travel, pool days, and everything else you've packed into summer already, your complexion may be looking and feeling a little less enthusiastic than it did a few weeks ago.

That's why we're excited to introduce the [Green Coffee & Adaptogen Radiance Ritual...](#)

Meet the Newest Addition to Our Facial Menu

The Green Coffee & Adaptogen Radiance Ritual combines antioxidant-rich green coffee extract, vitamin C-packed Kakadu plum, and an adaptogenic mushroom blend to help brighten, balance, and revive skin that's feeling the effects of summer.

No scrubbing. No downtime. Just happier skin.

— QUICK QUIZ —

What Makes Botox Look *Natural?*

- ☐ A. | The brand
- ☐ B. | The amount
- ☐ C. | The injector
- ☐ D. | Your age

ANSWER BELOW

The answer? C.

While the type of product and the amount used certainly matter, the biggest factor is who's holding the syringe.

Natural-looking results require more than knowing where to inject. They require an understanding of facial anatomy, balance, movement, and the naturally occurring facial changes we all see.

That's why patients trust Dr. Lichten and the experienced team at Central Ohio Plastic Surgery. Every treatment begins with a careful evaluation of your facial structure, muscle movement, skin quality, and aesthetic goals before a personalized treatment plan is created.

The best injectable results don't announce themselves. People simply think you look well-rested. Or happier. Or wonder if you've been on vacation. And that's exactly the point.

Proof beats promises.

Want to see what natural-looking results look like?

This Month's Most Asked Question: BOTOX® or Filler—Which One Do I Need?

Many people use the terms BOTOX and filler interchangeably, but they're not the same thing.

BOTOX works by relaxing targeted muscles that contribute to expression lines and wrinkles.

Fillers restore volume and help improve facial contours that may change over time.

Some patients benefit from one. Others benefit from both.

Click on the button below to hear what Dr. Lichten has to say about each treatment option.
